CLARITY TECHNOLOGY GROUP, INC. AND CLICKSMART COMPUTERS ANNOUNCE STRATEGIC ALLIANCE

August 1, 2009 – Clarity Technology Group, Inc. and ClickSmart Computers have formed a strategic service alliance. The two companies will operate side-by-side out of the same facilities to provide clients with a complete package of seamlessly integrated technology solutions.

“Clarity Technology Group has been providing network consulting and support since our inception in 1999. As our company has grown and diversified into software development and data center services, it became obvious that we needed to add leadership to give our network support department the clear direction and attention it deserves.” said Bill Thousand, President of Clarity Technology Group, Inc. “We learned about ClickSmart Computers and were immediately impressed with their philosophy, growing reputation and commitment to service and support.”

Working together, Clarity Technology Group and ClickSmart Computers will be able to provide clients with a single source for software development, hardware, consulting, support and data center services including website hosting, offsite backup and spam filtering.

“This partnership with Clarity gives ClickSmart the opportunity to truly be a full-service technology provider to our small business clients. We enter each client relationship with the goal of being a strategic technology partner dedicated to our client’s success. Having direct access to Clarity’s comprehensive software development and hosting services puts us in a position to not only provide great support, but also provide great solutions that fit our clients’ business needs.” said Dale Jewell, President of ClickSmart Computers.

About Clarity Technology Group, Inc.

Founded in 1999, Clarity Technology Group, Inc. is a local leader in browser based software development with a product line that includes CRM, e-Mail Marketing, Time and Billing, CMS and Event Registration. The Clarity Technology Group, Inc. development process involves an extended needs analysis to determine not only what the user wants on the screen, but what they are trying to accomplish. This process results in extremely cost-effective and usable solutions. For more information visit www.claritytech.com.

About ClickSmart Computers

ClickSmart Computers was formed in 2007 and has very quickly earned a strong reputation for impeccable service as a general IT consulting and support provider. For more information visit www.clicksmartcomputers.com.
